

CLAIM AMENDMENT

1. A recreational vehicle having a main room and an expandable room/movable relative to said main room to provide additional living space to said main room, a drive mechanism for moving said expandable room between extended and retracted positions, a sealing member positioned between the main room and the expandable room, and a mechanism mounted adjacent to a top edge of said expandable room, to move for moving the relative position of the sealing member and a sealing surface of the recreational vehicle, to enhance the sealing between the expandable room and main room.
